Instructions for Skills Practice – Use Case Specification

Assignment
Using the use case specification (UCS) authoring techniques that were presented in class, and the approach demonstrated in the recorded video demo, create a use case specification for the **Pick Order** use case for the iSchool Webstore System. To understand the Pick Order use case, you may consult the context diagram that was presented as the instructor's solution to Skills Practice – Context Diagram.

Please use the word processing template file provided or use that file as a guide when authoring your use case specification.

For more information on the iSchools Webstore, please see the *Skills Practice Case Scenario - iSchool Webstore* document.

Tools
Use MS Visio 2013 unless you have made other arrangements with the instructor. I have made a demo available that shows how to make use case diagrams using this tool.

Length
Each section of the template should be completed based upon the examples provided. Make sure that flow state explicitly how they start and how they end.

Format
Your work should be submitted as a **single PDF document**.

File Naming Conventions
The name of the file that you submit should include both your name and the name of the assignment. It should follow the form:

    trainor_kevin_use_case_specification.pdf

Due By
Please submit this assignment by the date and time shown in the Course Schedule.
