Instructions for Resume_1 Coding Assignment

Assignment
Using the work that I did in the tutorial video (Create a Resume with XHTML and CSS) as a guide, create your own resume. You should create one XHTML page and a linked CSS stylesheet.

Tools
Create both your XHTML page and your CSS stylesheet using Oxygen XML Editor. Test your work using the browser function of Oxygen. Zip up the directory containing your work using the operating system compress function available on your computer. Submit one zip file to the drop box.

Length
The resume should have at least the following sections:
- Name
- Contact
- Employment
- Education

The stylesheet should be complete enough to **control the font family and font color** of some of the type. Creating a neat XHTML page and a neat CSS stylesheet is more important that creating an elaborate document with elaborate styling.

Format
Submit one .zip file to the drop box. The zip file should contain a single directory. The directory should contain one XHTML file and one CSS file.

File and Directory Naming Conventions
The directory should be named to include your name and the assignment name:

   lastName_firstName_resume_1

The files should be named:

   resume.html
   resume_style.css

The name of the .zip file that you submit should include both your name and the name of the assignment. It should follow the form:

   trainor_kevin_resume_1.zip

Due By

Please submit this assignment by the date and time shown on the weekly schedule.
