

Instructions for Skills Practice – Ragbag Exercise

Assignment

The goal of this assignment is to create a list of terms relating to the data within the iSchool Webstore problem domain. The terms should be separated into the following categories:

1. Entity Type
2. Attribute
3. Relationship Type
4. Important Instance

Follow the technique demonstrated in the tutorial video that accompanies this exercise. Do the same kind of directed brainstorming regarding the data requirements of the iSchool Webstore as I did for the Student Attendance application in the tutorial video. I have provided a starter file for your list of terms. Please use this file as the starting point for your submission:

starter_file_for_ragbag_exercise.txt

Please remember to convert your list of terms to PDF format before submitting your work.

Tools

You may use any text processor to do your assignment. Remember to convert the .txt file to .PDF before submitting your work.

Length

The length of your list of terms should be comparable to the list that I create in the tutorial video.

Format

Please submit a **single PDF document**.

File Naming Conventions

The name of the file that you submit should include both your name and the name of the assignment. It should follow the form:

trainor_kevin_ragbag_exercise.pdf

Due By

Please submit this assignment by the date and time shown in the Weekly Schedule.
