IS590PM – Project Management
Instructions for Completed Project

Assignment
This deliverable is the completed project itself. I will be grading it based upon my viewing of your Team Presentation Video.

Expectations
When grading the Completed Project, I will consider the following:

Functionality
The project must solve a real problem or capitalize on a real opportunity for the stakeholders. The impact of the project should be significant and its scope should be commensurate with the length of the project and the size of the project team.

Design
The design of the products and services produced by the project should reflect best design practices as taught at the Illinois iSchool.

Content
Any content or other intellectual property that is part of the products and services produced by the project should reflect the best practices taught at the Illinois iSchool.

Testing
Any products or services produced by the project must be properly tested and accepted prior to delivery to the client. Test planning and execution should reflect the best practices taught at the Illinois iSchool.

Documentation
The Agile approach to documentation is minimalistic. Nevertheless, project deliverables must include any documentation needed by the users and maintainers of the products and services of the project.

Training
The Agile approach to training is minimalistic. Nevertheless, project deliverables must include any training needed by the users and maintainers of the products and services of the project.

No Submission Required
Since the completed project will be graded based upon the Team Presentation Video, no further submission will be required.

Date Due
See due date for Team Presentation Video.
