

How to Submit a Coding Assignment

- Check that your work conforms to **all** of the assignment instructions.
- Review grading rubric to make sure that you have captured **all** available points.
- Make sure that you have included **all** files needed for testing (including starting files).
- Check the names of all programs, files, and directories to make sure that they follow naming conventions.
- Upload just 1 properly-named zip file to the Canvas submission activity.
- Download the file that you have just submitted and test it! Confirm that you have submitted the proper file!
- Remember that **resubmissions after the deadline are not permitted.**
